EXPERIENCE

IT Analyst
Honeywell

Sep 2023 – Mar 2025 | Brno, CZ

- Scaled a local audit script into a comprehensive monitoring application for **tracking configuration compliance** and performance bottlenecks.
- Standardized development workflows by establishing **GitHub CI/CD** and testing guidelines, reducing deployment errors.
- Co-developed user-facing ServiceNow forms that simplified reporting of device issues.

Network Technician
Honeywell

Jan 2023 – Sep 2023 | Brno, CZ

- Shadowed senior engineers to learn infrastructure and IT workflows.
- **Led a small team** to develop automated audit solution that **aggregated network accessibility data** to flag discontinued devices, cutting unnecessary licensing costs.

Software Engineer (Internship)
Red Hat

Jun 2019 – Sep 2019 | Brno, CZ

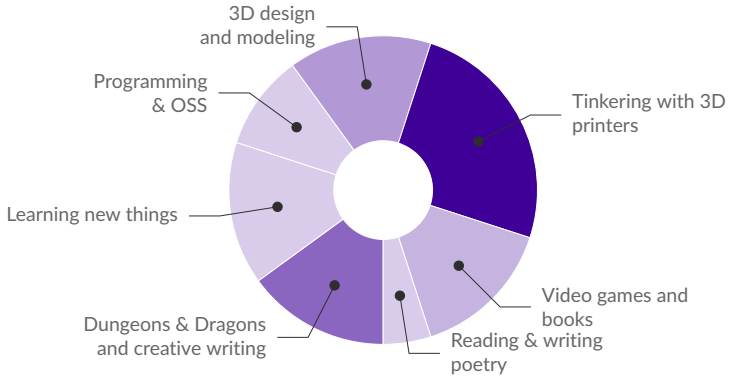
- High school internship; spent most of the time **debugging and linting** Python code using pylint and similar tools before contributing to an **RPM packaging wizard** UI.

Smart Home Technician (Part-time)
LIVIN'IN

Jul 2018 – Aug 2020 | Brno, CZ

- Installed and wired smart home systems independently.
- Hands-on electronics work including soldering sensors and security components such as fingerprint scanners.

HOBBIES



LIFE PHILOSOPHY

"A broken thing is an opportunity to learn by fixing it."

EDUCATION

Bachelor's in Information Technology
Brno University of Technology

Sep 2019 – Jul 2024

Thesis: Smart home sleep optimization — Predicted ideal sleep onset using a random forest regression model trained on smart ring sleep data, user physical state, and target wake time; controlled smart lighting to promote natural tiredness.
